

# getWorklogComment

Cprime Apps has been rebranded as Anova Apps. Please note the only effect is the company name - all of our products' names, logos, functionalities, support, etc. is exactly the same. The new location to our documentation space is <https://anovaapps.atlassian.net>.

## Availability

This routine is available starting **katl-commons 2.5**.

This routine is available for Jira server and cloud deployment options.

## Syntax for the server version:

```
getWorklogComment(worklog)
```

## Syntax for the cloud version:

```
getWorklogComment(issue, worklog)
```

## Description

Returns the comment associated with the worklog.

## Parameters for the server version

Parameter	Type	Required	Description
worklog	Number	Yes	Id of the selected worklog.

## Parameters for the cloud version:

Parameter	Type	Required	Description
issue	string	Yes	The issue key.
worklog	Number	Yes	Id of the selected worklog.

## Return type

**String**

## Example 1 (server only)

```
print(getWorklogComment(11201))
```

Prints the comment associated with the specified worklog (the worklog with id = 11201).

## Example 2 (server only)

```
for(number id in getWorklogIdsForUser("admin", key)){
    print(getWorklogComment(id))
}
```

Prints the comment associated with the admin's worklogs of the current issue.

## Example 3 (cloud only)

```
print(getWorklogComment(key, 11201))
```

Prints the comment of the worklog with id = 11201, on the current issue.
